# ANBU BLACK OPS

This question comes under the category of steganography.

The question has provided us with an audio file. For visualising it, open it in a software such as Audacity or Sonic Visualiser. I am using Sonic Visualiser here:

After opening it add the spectrogram for the audio by going to **Pane -> Add spectrogram -> Mix by audio-joiner.com: All channels Mixed**

Now move through the audio till you reach the end. At the end you will get the flag (might have to zoom to get it clearly):
